

re: Docket Number
98p-0151/CPI

There is evidence that many downed animals carry diseases and are not suitable for food. The number of downed animals could be reduced with proper precaution and the remaining should be humanely disposed of and not put in the food chain.

5360 '01 JAN 22 A7:35

Keep our food chain operating as humanely and safe as possible.

thank you,
Betty Mckenney
